

Sticky Mats 18"x45" Grey

Description

The adhesive-coated contamination control mat captures particulates from foot traffic and equipment wheels prior to entry into the clean room.

Each Sticky Mat is adhered to the floor with a full bottom sheet of double-faced adhesive film. A clear release sheet protects the top sheet of the Sticky Mat until it is ready to use. Individual sheets are removed by use of either an uncoated edge, or a corner tab. The corner tabs are consecutively numbered to show the number of remaining sheets, thus providing the economy of only one sheet being removed at a time.

Purchase Information

ID: CONE-1845-308G
Material: Low density polyethylene film with clearwater-based acrylic adhesive
Size: 18" x 45" (46cm x 114cm)
Colour: Grey
Packaging: 30 Layers per mat, 8 mats per case
